***WARNING:**

Each paper or fee filed by "Express Mail" must have the number of the "Express Mail"
mailing label placed thereon prior to mailing 37 C.F.R. 1.10(b).
"Since the filing of correspondence under § 1.10 without the Express Mail mailing label
thereon is an oversight that can be avoided by the exercise of reasonable care, requests for
waiver of this requirement will not be granted on petition." Notice of Oct. 24, 1996, 60 Fed.

available with the exception that the reference entitled "Studies on *Ganoderma*, *Letinus* and *Auricularia* Fungi" is provided with an English abstract. Concise explanations of the relevance of the other references follows next.

"Bag Log for Mushroom Cultivation and Management"

This citation states/lists the selection of cultural materials (such as sawdust, wheat and rice media, CaCO₃ and water) for culturing mushroom, and the control of incubation conditions (e.g., relative humidity, temperature and air condition) to obtain an optimal harvest of the mushrooms.

"Production and Manufacture of Mushroom Fungi"

This citation relates to the practical teachings for mushroom cultivators to select and prepare appropriate cultural media for culturing mushroom. Specifically, it describes the key points to select cultural media (e.g., synthetic medium, complex medium, basic medium, enriched medium, selective medium and differential medium) based on different purposes for achieving the desired effect.

The three (3) cited references describe "cultural conditions" and "culture media" that are pertinent to the cultural conditions and media used to produce the claimed solid fruiting body of *Antrodia camphorata*, including for example the selection of components for the culture media and conditions such as relative

humidity in a plastic bag for mycellium culture (see, e.g., "Studies on Ganoderma, Lentinus and Auricularia Fungi" which teaches providing a relative humidity of 60-80% and 70-90%). Nevertheless, the references do not teach or suggest all of the conditions and controls that are required to prepare the cultured *Antrodia camphorata* as claimed.. In particular, the references do not teach or suggest the maintenance of the recited medium at the recited temperature differences between day and night.
